VetCheck Request from Appointment	5

OVERVIEW

VetlinkPRO's VetCheck integration allows users to quickly prefill forms, questionnaire's and information sheets in VetCheck with client and patient details from VetlinkPRO and then quickly share/email those to clients. A link to the shared document then automatically gets saved back to the patients clinical history or Document Manager depending on where it was requested from.

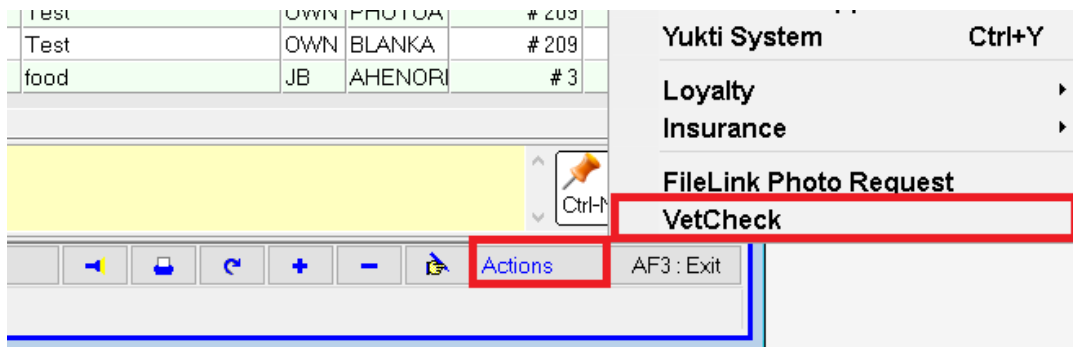

ENABLING VETCHECK

You will first need to sign up with an account from VetCheck. The VetCheck integration is an extra module in VetlinkPRO so once you are ready to integrate, please contact sales@cfl.co.nz to enable this.

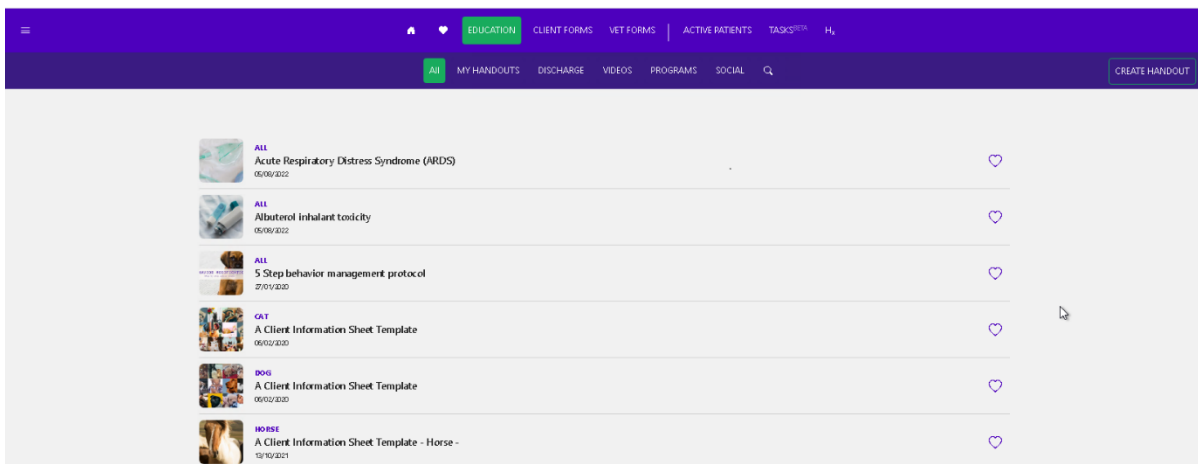

VETCHECK REQUEST FROM PATIENT RECORD

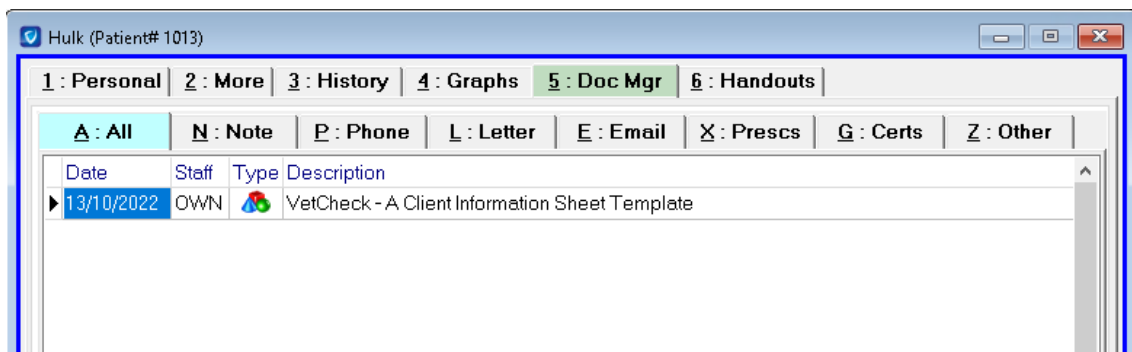

1. Open the Patient record you wish to request a VetCheck form from
2. Go to **Actions -> VetCheck**

3. The VetCheck Login page will open
4. Log in with VetCheck credentials
5. Choose form from VetCheck (for more information on selecting / choosing/ sharing forms contact VetCheck)

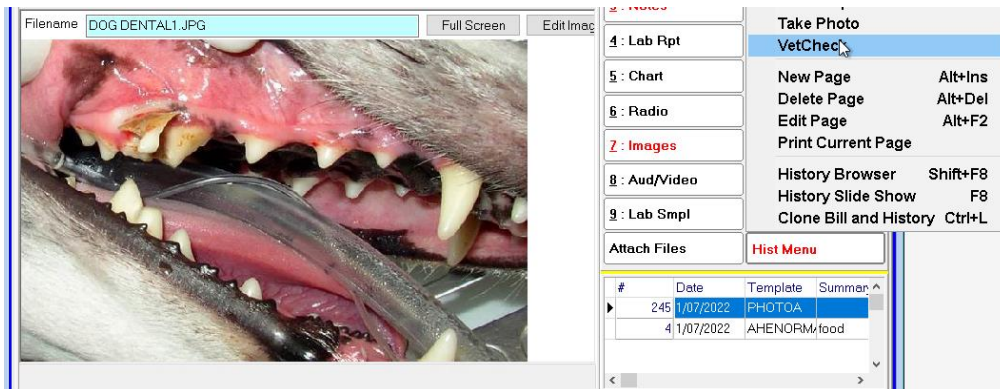

6. Form should be populated with client / patient details from VetlinkPRO
7. Share / Send form
8. A URL link will be created in the Patient document manger to view the form.

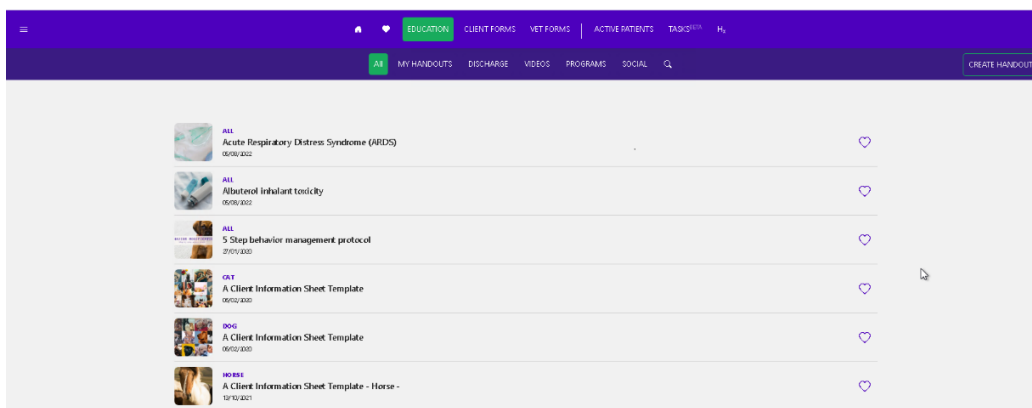

VETCHECK REQUESTS FROM CLINICAL HISTORY

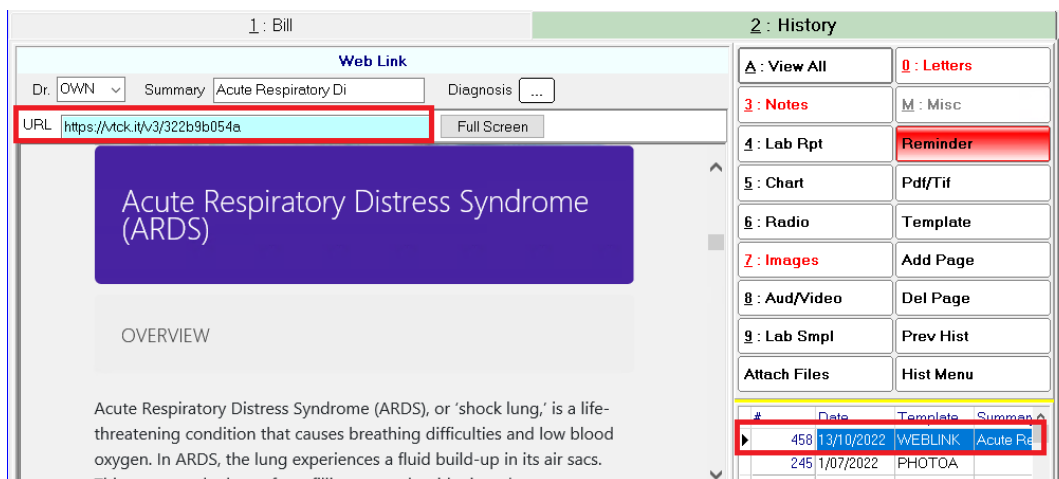

1. Open the Clinical history from the bill for a patient
2. Go to Hist Menu -> VetCheck

3. The VetCheck Login page will open
4. Log in with VetCheck credentials
5. Choose form from VetCheck (for more information on selecting / choosing/ sharing forms contact VetCheck)

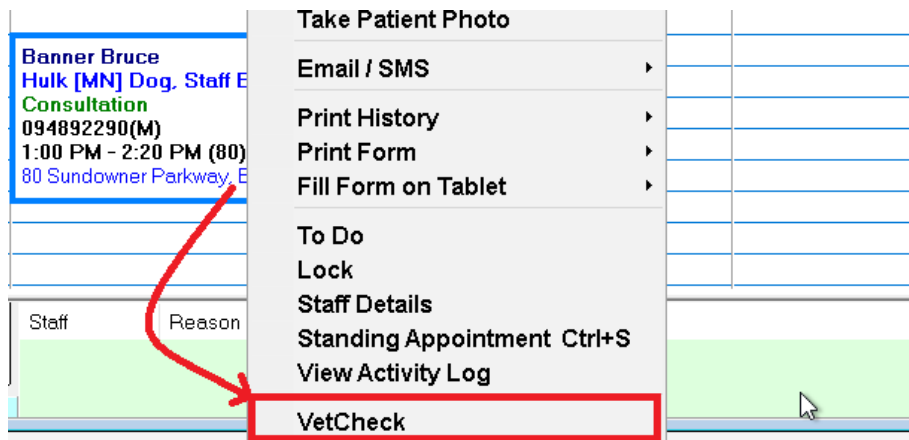

6. Form should be populated with client / patient details from VetlinkPRO
7. Share / Send form
8. A URL link will be created in the clinical history to view the form.
(You may need to close and open the bill/history for the link to appear in the clinical history)

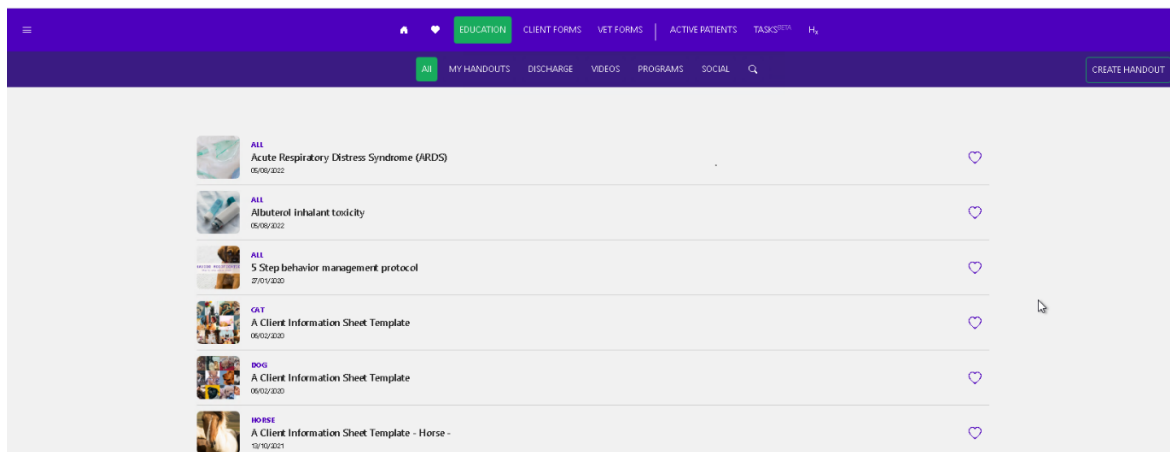

VETCHECK REQUEST FROM APPOINTMENT

1. Open the Appointment Book and right click on the appointment you wish to request a VetCheck form from and select **VetCheck**

2. The VetCheck Login page will open
3. Log in with VetCheck credentials
4. Choose form from VetCheck (for more information on selecting / choosing/ sharing forms contact VetCheck)

5. Form should be populated with client / patient details from VetlinkPRO
6. Share / Send form
7. A URL link will be created in the Patient document manger to view the form.
